Preformed Thermoplastic Markings

NOTE NEW ITEM CODES

PREFORMED THERMOPLASTIC

High-Performance NO-PREHEAT/PREHEAT Technology

RAE's Preformed Thermoplastic is a durable pavement marking system where pre-cut thermoplastic lines, arrows, letters, numbers, and symbols are easily installed by hand torch without specialized melting equipment or metal stencils.

Preformed thermoplastic pavement marking materials combine the convenience of pre-cut markings with the performance qualities of hot applied thermoplastic.

Engineered for enhanced visibility during both day and night, RAE's preformed thermoplastic pavement markings are made with Swarco's brilliant glass beads which are distributed throughout the material during the manufacturing process.

With installation using just a propane torch, thermoplastic stop-bars to bike symbols have never been so EASY TO INSTALL!

PREFORMED THERMOPLASTIC Pavement Marking Rolls

Thermoplastic Rolls and Lines

RAE's High-Performance Preformed Thermoplastic available in both pre-cut lines and rolls for Stop Bars, Cross Walks, Parking Stalls, etc. It is used by Military and Government agencies around the country.

The road surface should be pre-heated to remove moisture. The preformed thermoplastic should then be heated after being set in place to approximately 300°F, or until the thermoplastic begins to conform to the road surface underneath.

PREFORMED THERMOPLASTIC Bike Lane Symbols

Bike & Handicap Symbols

Bike Man Symbol 8' x 6' - 90 MIL

Bicycle Lane & Bike Path Symbols help to distinguish these shared or protected lanes and make bicycling safer for everyone. With the rapid trend of cities implementing bike lane marking in their budgets, preformed thermoplastic markings are a popular choice for durable and easy to install markings.

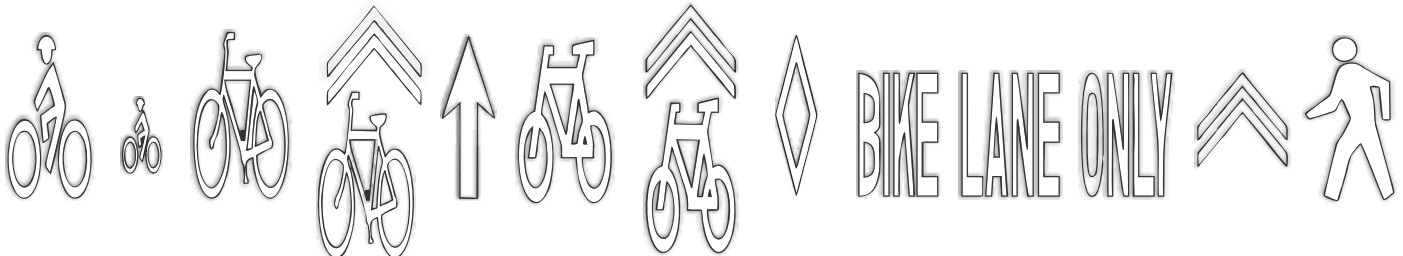

These markings meet most Federal and State Specs. - as well as FHWA/MUTCD standards.
