# 9510 WHITE F/D LATEX SUPREME TRAFFIC MARKING PAINT

Brilliant White

Preparation	Application
<p>The surface to be painted must be dry, free of grease and oil and brushed free of loose dirt. Striping paints will not adhere to unclean surfaces. Application equipment must be clean from all previous paint(s).</p>	<p>Mix paint thoroughly before using. Surfaces should be clean and free from dirt and debris. Newly sealed or asphalted surfaces should be allowed to cure before application. Paint only in dry weather with no forecast for rain. May be applied by a spray machine, roller or brush.</p>
<p><b>Thinning</b></p> <p>Thinning is normally not required, but a small amount of water may be added if needed. <i>Add water sparingly!</i> Diluting with water can reduce paint viscosity rapidly.</p> <p>DO NOT add gasoline, oil or any other petroleum-based products to waterborne paints.</p>	<p>Application Rates: Apply at 15 mils. wet , 7.5 mils dry</p> <p>Coverage: Approx. 16 gallons will stripe a 4-inch line one mile.</p> <p>Glass beads can be broadcast at a rate of 4 - 6 pounds of beads per gallon. If spraying, do not mix beads directly into the paint.</p>
<p><b>Drying Times</b></p>	<p><b>Application Conditions</b></p>
<p>Dry times are dependent upon weather conditions. The warmer the temperature, the faster the paint will cure. Direct sunlight will speed up dry times. For this product, a basic drying schedule is:</p> <p style="padding-left: 40px;">10 min. (walk on) - 20 min. (drive on)</p> <p><i>Note: changes in weather conditions (ie. temp. dropping after application, cold surface temp.) can delay above cure times drastically.</i></p>	<p>Recommended application conditions: Apply between 50°F minimum and 90 °F and at least 5 °F above dew point with a relative humidity below 85%. Temperatures should remain above 50°F for a 24 hour period.</p>
<p><b>Safety Precautions</b></p>	<p><b>Application Equipment</b></p>
<p><b>Always refer to the SDS (Safety Data Sheet) for Handling and Hazard conditions.</b> Keep away from open flame. Avoid prolonged or repeated contact with skin. Avoid breathing of vapors or spray mist. Do not take internally. Close container after each use. Wear respirator, eye protection and protective clothing when handling.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div data-bbox="168 1478 526 1638"> <p><b>PERSONAL PROTECTIVE EQUIPMENT</b></p>  <p>Splash Goggles + Gloves + Synthetic Apron + Dust and Vapor Respirator</p> </div> <div data-bbox="581 1478 721 1638">  <p><b>KEEP FROM FREEZING</b></p> </div> </div>	<p><b>Spray Equipment:</b> The use of stainless steel spray equipment is strongly encouraged, due to the fact that an alkaline paint will “surface shock” when exposed to mild metals. Only stainless steel or plastic spray equipment should be used. Straining the paint when using spray equipment is ALWAYS recommended.</p> <p><b>Airless Sprayers:</b> Use pressure between 1500-2000 psi - with tip size between .015” - 0.19” (note: use the lowest pressure necessary to achieve a flat edge-line)</p> <p><b>Brush:</b> Use Nylon/Polyester Natural Bristle</p> <p><b>Roller:</b> Use 3/8” Shed-resistant cover with phenolic core</p>
